## PROFESSIONAL SUMMARY

Highly motivated and detail-oriented DevOps Engineer Fresher, recently graduated with a Bachelor of Technology (B-Tech) in Electronics and Communication Engineering (ECE). Possess a strong foundation in AWS, Docker, Kubernetes, Terraform, Git, Jenkins, Linux, and CI/CD, with hands-on experience in infrastructure automation, containerization, and cloud deployment projects. Passionate about cloud technologies, DevOps practices, and continuous learning to build scalable, secure, and automated solutions. Seeking an entry-level DevOps Engineer role where I can apply my technical skills, contribute to real-world production environments, and grow as a cloud and DevOps professional.

---

## TECHNICAL SKILLS

- **Cloud Platforms:** AWS, Azure
- **Operating Systems:** Linux, Windows
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Containerization:** Docker, Kubernetes
- **Infrastructure as Code:** Terraform, Ansible
- **Monitoring Tools:** Prometheus, Grafana
- **Scripting Languages:** Python, Shell Scripting
- **Version Control:** Git, GitHub
- **Build Tools:** Maven

---

## PROJECTS

**Title:** Enterprise AWS 3-Tier Architecture – CI/CD Infrastructure Automation

**Tools:** AWS (VPC, EC2, ALB, Auto Scaling, RDS MySQL, IAM, CloudWatch, NAT Gateway), Terraform, Git, Linux, Jenkins, Nginx, MySQL, CloudWatch

**Description:** Designed and automated a highly available and secure 3-tier web application infrastructure on AWS using Terraform, with Jenkins-based CI/CD automation for infrastructure provisioning and deployment.

### Responsibilities:

- **Individual project**
- Provisioned a 3-tier AWS architecture consisting of public web, private application, and isolated database tiers across multiple Availability Zones.
- Automated infrastructure provisioning using Terraform, including VPC, subnets, ALBs, EC2 Auto Scaling Groups, RDS MySQL, IAM, NAT Gateway, and security groups.
- Implemented Jenkins CI/CD pipeline to automate Terraform initialization, planning, approval, infrastructure provisioning, and teardown.
- Configured secure communication between tiers using restricted Security Group rules and private networking.
- Implemented Terraform remote state management using Amazon S3 with DynamoDB state locking.
- Configured CloudWatch alarms and SNS notifications for infrastructure monitoring and CPU utilization alerts.
- Used Ubuntu Linux, Git, and Jenkins for infrastructure configuration, automation, deployment, and troubleshooting.

---

## **EDUCATION**

**B-Tech (Electronics and Communication Engineering)** - (2022 - 2026)

St. Martin's Engineering College

**Intermediate (MPC)** - (2020 - 2022)

Veda Junior College

**Secondary School (SSC)** - (2019 - 2020)

Vikas E.M School

---

## **ACHIVEMENTS**

- Participated in the National Level Entrepreneur Development Event (SWAYAMKRUSHI-2023) conducted by the Department of ECE, St. Martin's Engineering College

---

## **CERTIFICATIONS**

- Microsoft Certified: Azure Fundamentals (AZ-900) – Microsoft
- Redis Certified: Redis Associate Cloud Operator — Redis
- Python for Data Structures, Algorithms, and Interviews – Udemy

---

## **DECLARATION**

I hereby declare that the information furnished above is true and correct to the best of my knowledge and belief.
